## Seed Starting

### Get a jump start on your garden

Start your seeds indoors for hardier vegetables and better blooms

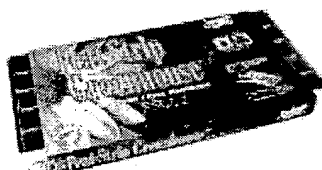

## Greenhouse Starters

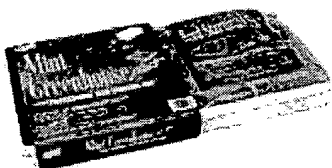

All Gardener's Delight Greenhouses have a clear humidome to keep humidity and warmth inside to promote quicker germination of seeds.

The white waterproof trays are designed to provide proper drainage for the rooting cells and pots. All greenhouses are available with either recyclable plastic inserts or biodegradable peat pots. Plant Paks and Transplant Paks are replacement rooting cells that refill the Greenhouse trays for the next batch of seedlings.

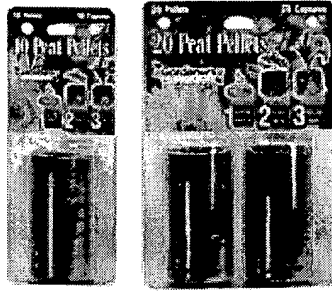

## Plant Starters

A complete line of Plant Starters for any combination of starting needs. A variety of Plant Starter sizes and styles are available to please every gardener. Each Plant Starter consists of a white waterproof tray and contains either recyclable plastic or biodegradable peat pots. Our all-in-one line of starters: The Garden Starter, Mini Greenhouse Plus, and Complete Garden Starter each contain a 4 quart bag of our Professional Seed Starting Mix to get you

gardening right away .

The *Ultimate* in convenience  
**Peat Pellets Quick, Easy,  
 Clean.....Just add water**

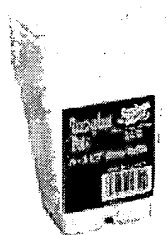

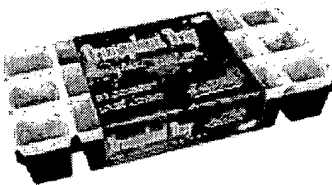

All-Natural Sphagnum Peat Moss is dried and compressed in a fine mesh netting to form a peat pellet. Just add water and the peat pellet expands 6 to 7 times its

original size to form a perfect pot and growing mixture that is ideal for starting seeds or cuttings. The mesh netting allows roots to grow through the pot walls

### **Peat Pellet Greenhouses**

The ultimate in convenience. Our Peat Pellet Greenhouses have it all - just add water and seeds! Each greenhouse comes with a waterproof tray and clear humidome cover to create the perfect growing environment.

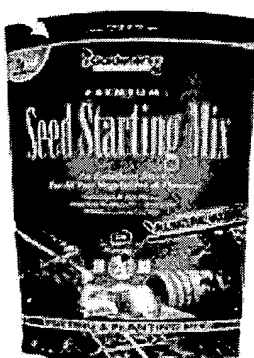

The 10 Peat Pellet Greenhouse fits easily in a standard windowsill.

### **The next step for seedlings**

Transplant Tray & Pots readies plants for indoor or outdoor use. The Transplant tray helps mature seedlings and ready them for outdoor planting. The waterproof carry tray holds 18 3 1/2" pots and can be easily moved outside during the day and inside at night to "harden off" maturing plants - adjusting for harsher outdoor conditions and protecting plants from frost. There are two sizes available for refilling the Transplant Tray 3 1/2" and 4 1/2".

**Premium Seed Starting Mix New!**  
 Premium mixture is an ideal medium

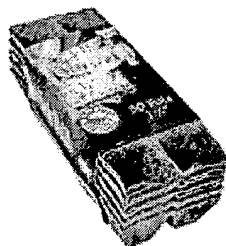

for seed starting and potting. This soilless mixture combines Canadian Sphagnum Peat Moss, Perlite, and Vermiculite to provide maximum aeration and moisture retention that gets seeds growing quickly. A time release fertilizer has been added to help nourish young plants through the various stages of growth.

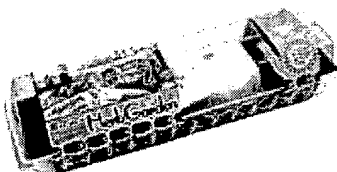

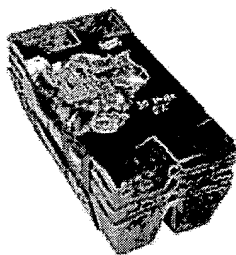

**100% Biodegradable Peat Pots** Natural sphagnum peat pots will naturally dissolve... like magic!

All-natural Peat is ideal for maturing and transplanting seedlings. Because they are biodegradable, our peat pots can be transplanted directly into the ground and will dissolve naturally over time. The use of peat pots can eliminate the threat of root damage and transplant shock from transplanting.

### **Premium quality Peat Strips Environmentally friendly.**

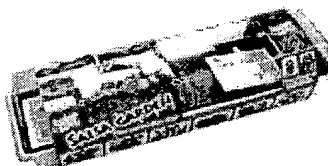

Starting seeds in our natural peat strips promotes stronger, more vigorous growth. Sphagnum peat moss offers growing benefits unlike any other products of its kind by encouraging strong root development. Peat strips and pots help nurture young plants by allowing their delicate roots to grow right through their soft natural walls and then be transplanted undisturbed into the garden.

**Unique collection of  
Garden Kits with seeds  
Tremendous value with 6  
full packages of seeds.**

Each kit has its own theme  
with complete instructions  
and planting guides.
